

Request # WCP23-014
(assigned by OMB)

CITY OF PITTSBURGH
REQUEST FOR WAIVER OF COMPETITIVE PROCESS

Contract Title: Kloopify

Contract Description: Greenhouse Gas Inventory of City Procurement - Scope 3

Contract Duration: 1 year

Requesting Department: City Planning Contract Type: Single Source Contract

Requests for exemption must be based on one or more of the categories listed in City Code 161.02B located here:

Please list all category numbers that apply (see page 2) 3

Justification:

Kloopify is a proprietary software-as-a-service solution dedicated exclusively to sustainable procurement
Kloopify is the only climate action platform in the market that provides purchasing professionals with automated,
near-time data into the climate impact of the commodities they buy. Kloopify is the only software provider
that can integrate carbon emissions data into everyday procurement processes.

The City of Pittsburgh

Dear Trevor,

When it comes to supporting a sustainable future, the City of Pittsburgh has been a national leader. In 2019, Pittsburgh became the second city in the US to formally commit to the UN Sustainable Development Goals. The city's newest Voluntary Local Review (VLR) published in 2020 is focused on how its procurement processes could be more sustainable and circular in nature. This VLR is another demonstration of Pittsburgh visionary leadership. This is because according to a study by Ernst & Young, the average organization's supply chain generates 11.4 times more emissions than direct operations.

Kloopify is proud to support the City's goal of achieving sustainable procurement practices:

- Kloopify is a proprietary software-as-a-service solution dedicated exclusively to sustainable procurement.
- Kloopify is the only climate action platform in the market that provides purchasing professionals with automated, near-time data into the climate impact of the commodities they buy.
- Kloopify is the only software provider that can integrate carbon emissions data into everyday procurement processes.

Furthermore, the Kloopify platform gives departmental managers the ability to track their performance and move forward with a data-driven strategy for increasing sustainability. The city can quickly see where their greatest emissions are coming from and take meaningful action toward reduction. Kloopify ties sustainability goals to action. The Procurement Team is able to identify key contributors within their buyspace and the City's overall environmental footprint and work with supply chain partners to reduce them.

We look forward to working together to help the City and support its blueprint for creating a more equitable and sustainable future for all.

Best regards,
