TASK:

The Pittsburgh Bureau of Fire has requested a quote to provide a bypass timer switch to allow Fire personnel to manually bypass the automated CAD/Network outage alert. The bypass switch will allow Fire personnel to set a mechanical timer, for up to 12 hours, to prevent the automated alerts from occurring during the set timeframe. Once activated, the bypass timer can't be reset to zero and will be active until the set time has expired. A single bypass timer is required for each PURVIS FSAS Station Control Unit.

PURVIS will connect the timer to the existing PURVIS FSAS Station Control Unit in each location. The timer will work in conjunction with the upcoming PURVIS FSAS software update for the Pittsburgh Bureau of Fire FSAS. Additionally, the PURVIS provided timer will be covered under the existing PURVIS FSAS Warranty, Maintenance and Service Agreement with the Pittsburgh Bureau of Fire.
