1. Introduction

1.1. [Summary](#)

The City of Pittsburgh, Department of Public Safety, Bureau of Animal Care & Control, seeks a consultant to examine and present the feasibility of building and operating a City-owned animal shelter. Proposals should be from experienced and interested firms that have successfully completed similar projects including the programming, conceptual planning, and full design of a new animal shelter providing animal services utilizing one location or inclusive of multiple satellite locations; clinic for veterinary services for medical care, spay/neuter/vaccinations/microchipping; animal shelter adoption centers; animal control stray management/housing of animals, cats, dogs, and wildlife.

1.2. [Background](#)

[The Bureau of Animal Care & Control](#) provides assistance to Bureaus within the Department of Public Safety, other City Departments and the Allegheny County Health Department in situations involving animals, both domestic and wild. The Bureau enforces City and State codes dealing with animals; issues citations and appears in court; helps to keep our City's parks animal-nuisance free; works with non-profit animal shelters; provides consultation to other municipalities concerning animal issues; and assists the Pennsylvania Department of Agriculture in tracking the rabies virus.

Presently the Bureau contracts with vendor partners to assist with vital portions of its day-to-day operations, including animal detention and veterinary services. In 2021, Pittsburgh's Office of the City Controller released [a performance audit](#) that recommended conducting a feasibility study to determine if greater operational and fiscal efficiency would be achieved by the City owning and operating its own shelter.

In 2023, the City received approximately 1125 animals (710 dogs, 375 cats, and 40 others).

The Bureau is staffed by fifteen (15) Animal Care & Control Officers, one (1) Supervisor, and one (1) Accounting Specialist.

The City of Pittsburgh is committed to the humane treatment of all animals. Individuals or organizations interested in performing the services required under this RFP must hold the same commitment and reflect that commitment in their proposal.

Similarly, in composing the 2024 operating budget, Mayor Ed Gainey's administration identified a number of budgetary priorities. Those that are relevant to the shelter project include, but are not limited to:

- Infrastructure: Building a modern infrastructure system that is reliable, secure and efficient to keep the city moving and connected and to ensure our bridges, roads, streets and paths are safe, reliable, and convenient.
- Environment: Ensuring that our greenspaces and rivers are safe and clean for recreation and commerce every day of the year by improving waste collection, reducing dumping, increasing efficiency, and reducing energy use and greenhouse gas emissions from City facilities and equipment.

- **Resident Empowerment:** Providing all residents the chance to contribute to the growth and vibrancy of their neighborhoods by ensuring that basic needs are met, diversity of all types is celebrated, and residents have equal access to resources and opportunity.
- **Economic Mobility:** Eliminating barriers to opportunity for education and employment for all Pittsburghers and ensuring inclusive growth in all our neighborhoods by investing in workforce development, entrepreneurship, and areas with high levels of reentering citizens.
- **Physical Mobility:** Connecting communities to economic opportunity and supporting improvements for all types of mobility and all types of users.
- **Critical Communities:** Improving the overall wellness of people in Pittsburgh by improving resource access for historically disadvantaged groups, low- and moderate-income households, individuals with mobility impairments, and people who use drugs, experience homelessness, are formerly incarcerated, or experience food insecurity.
- **Equity:** Investing in the social, economic, and geographic needs of all Pittsburghers, regardless of race, class, gender identity/expression, sexual orientation, religion, national origin, or immigration status, through improving equitable access to city resources and services, safety in neighborhoods, and opportunities to achieve fullest potential to overcome structural barriers.

In addition to the items identified in the Scope of Work section, potential vendors are encouraged to present proposals that are in alignment with these goals.

Further information concerning the bureau's functions, call volume, et cetera, may be found at the above links.

All submittals, whether selected or rejected, shall become the property of the City of Pittsburgh and will not be returned.

All costs associated with proposal preparation shall be borne by the applicant.

3. Scope of Work

3.1. Scope of Work Overview

The City desires to provide shelter and care for both stray and unwanted animals that are found within the Pittsburgh city limits. The City's primary concern is not who owns and operates the facility, but rather there be a facility with adequate capacity for holding animals in a humane manner that promotes good health, prevents the transmission of contagious diseases, and provides an adequate opportunity for each adoptable animal to find a home with a responsible individual or family. To meet these needs any proposed shelter facility must:

- Maintain and operate an animal shelter with sufficient capacity and resources to provide shelter services for all animals strayed, abandoned or otherwise deposited to their care from within the City of Pittsburgh to include feeding, boarding, exercise, and non-emergency veterinary care of those animals.
- Provide humane treatment for unwanted and stray animals delivered to the shelter by a Pittsburgh Animal Care & Control Officer, designees of the City, or residents residing within Pittsburgh city limits.
- Provide designated holding areas for animals that are placed in protective custody and/or need to be placed in rabies' quarantine, to include the sufficient capacity to hold these animals for a potentially extend period of time.
- Provide sufficient receiving/intake staff to accept and process the animals received from the City of Pittsburgh.
- Collect all animal-related fees imposed by the City ordinances, including but not limited to license fees, impoundment fees, redemption fees, veterinary fees, and state-mandated fees.
- Maintain adequate staffing levels.
- Offer low-cost spay/neuter, vaccination and microchip services.

3.2. Scope of Work Detail

The selected vendor will be tasked with providing a needs assessment and feasibility study detailing viable options for the building and operation of a new City-owned animal shelter, and compare these options to the City's present solutions for these services. The study shall include a narrative review and summary, that shall include sufficient detail, advice, and recommended options for consideration to facilitate the City's efforts. This analysis should include but not be limited to recommendations on how to increase pet retention, shelter diversion approaches, increase access to spay and neuter programs for the public, enhance fostering and adoption programs, canine behavioral modification and enrichment training for staff and the public, improve public outreach and education, manage volunteer programs, and revise animal control ordinances.

Services to be provided:

- Provide an overview of animal sheltering and adoption services in the City, and identify and interview local stakeholders as part of the overall analysis. Consultant must describe their planned approach to obtaining input from key stakeholders including identification, scheduling of stakeholder input processes within the study timeline, and explanation of how stakeholder input will be used to inform the study.
- Analyze the ability and capacity of current provider, both current and future. Examine current status of present animal shelter facility and operations and future animal shelter needs. Take into account demographic trends, the number of animals handled in recent years, estimated construction and operating budgets (if any), operational programs, population level served, current and future staffing levels, and agency objective and goals.
- Evaluate different alternatives for delivering care for animal sheltering services on a local and regional level, including management of the facility. Conduct a survey of Allegheny County, City of Pittsburgh, and neighboring municipalities to determine the individual and combined average and peak sheltering needs. Project future sheltering needs (based on past sheltering demand and likely future population growth).
- Evaluate options for providing animal shelter services, including but not limited to: (1) utilizing current solutions; (2) partnering with Allegheny County facilities; and (3) building and operating a new animal shelter within the City of Pittsburgh. Include in the analysis (1) the cost and financial feasibility associated with each alternative and (2) data on the costs incurred by other cities using similar approaches to service delivery. Determine appropriate site, building, and parking requirements for a local facility/facilities based on existing and projected needs. The analysis will also consider whether one or more sites would be the most effective. Shelter site location should consider visibility, accessibility and suitability.
- Evaluate different management structures, their estimated yearly cost, and advantages and disadvantages.
- Determine expectations relative to non-profit assistance relative to sheltering, spay/neuter and education. Explore and report on any public/private sector collaborative efforts, and how this model may be implemented.
- Analyze the advantages and disadvantages of the alternatives; provide a preliminary range of cost estimates to include all upfront capital and construction costs, and on-going management/staffing, vehicles, veterinarian services/supplies, and operating costs and revenues.
- Provide a final recommendation on the preferred animal shelter model for the City of Pittsburgh.

4. Proposal Format Requirements

4.1. Response Format

All submitted responses shall follow the formatting below, and all proposals will need to be provided electronically through the City's e-Procurement Portal. Each numbered section is to be uploaded as a separate file. If hard copies of submissions are required, each numbered section shall be a removable tab. Document pages shall be 8-1/2 inches by 11 inches in size or folded to such a size.
