RE: Encroachment Permit

Dear Ms. Ricks:

GPD Group is the engineering and architecture firm representing AT&T regarding the expansion of their wireless coverage area at 240 Fourth Avenue, Pittsburgh, PA 15222. As proposed, AT&T would like to mount three (3) antennas to the north façade of the existing parking garage and three (3) antennas to the south façade of the same parking garage. With the property line at the edge of the building, this puts the proposed antennas in the public right of way.

On behalf of AT&T, we would like to request an encroachment permit to allow the antennas to be mounted on the façade of the parking garage. Located approximately 45 feet above ground level, we feel that there will not be any disturbance to the current use of the right of way, while providing the benefit of better wireless coverage to the area.

In regards to the visibility of the antennas, the tops of the antennas will be kept at or below the level of the top of the parapet. In addition, the antennas will be painted in order to match the color of the existing façade.

Thank you for your consideration in the matter of granting an encroachment permit. Your time is greatly appreciated.

Sincerely, GPD Group

Edward Block, PE Project Manager
