

# City of Pittsburgh, Equal Opportunity Review Commission 2025 Q2 Report

**Year:** 2025

**Quarter:** Q2

**Report Date:** July 18, 2025

## Introduction

The City of Pittsburgh's Equal Opportunity Review Commission (EORC) plays a vital role in advancing equity and inclusion in city contracting processes. Established under Pittsburgh City Code, Chapter 177A, the EORC is responsible for ensuring that Minority Business Enterprises (MBEs), Women Business Enterprises (WBEs), LGBTQ Business Enterprises (LGBTQ-BE), and other disadvantaged business entities have fair opportunities to participate in contracts funded by public dollars, including the City of Pittsburgh and our sister-agencies. The commission monitors compliance with diversity goals, evaluates vendor performance, and fosters accountability among contractors and subcontractors. The Equal Opportunity Review Commission (EORC) reviews and approves all applicable professional service and construction contracts for compliance with Chapter 161 of the Pittsburgh Code of Ordinances, as well as the contractor's compliance with City of Pittsburgh's policies regarding minority and women business enterprise opportunities. It also develops policies regarding employment opportunities for minorities and women in contracting with the City of Pittsburgh and its Authorities.

The EORC is staffed by the Office of Business Diversity (OBD), a unit of the Mayor's Office. As part of its mandate, the EORC is submitting this quarterly report to Mayor Ed Gainey, City Council, and City Controller to provide transparency and demonstrate progress on the City's goals to increase equity in its contracting processes. This report outlines participation by MBEs, WBEs, and other targeted businesses, summarizes the work performed by contracting type, and documents payments received by the vendors, serving as a critical tool to assess and advance equitable economic growth in Pittsburgh.

## Table of Contents

- I. Introduction
- II. Overview of MWDBE, VOSB, LGBTQIA+ Participation as Prime and Subcontractors in Q2 of 2025
- III. Vendor List and Tracking Work Performed
- IV. Administrative and Policy Initiatives
  - a. Overview of the Procurement Modernization Initiative
  - b. In Progress Administrative and Policy Initiatives
    - i. Enhanced Tracking and Compliance for Equal Opportunity Review Commission – Implementing Alerts, Violations, and Recommendations/Sanctions
    - ii. Invitation for Bid (IFB) Solicitation Template and New Review and Selection Policy and Process Update as of Q2 of 2025
    - iii. Procurement for Good Jobs Update as of Q2 of 2025
    - iv. Pittsburgh Regional Disparity Study Progress as of Q2 of 2025
- V. Conclusion

## Overview of MWDBE, VOSB, LGBTQIA+ Participation as Prime and Subcontractors in Q2 of 2025

The City of Pittsburgh's EORC is steadfast in its commitment to ensuring that disadvantaged businesses have equitable access and opportunities to participate in City contracts. Through the implementation of inclusive policies, proactive outreach, and comprehensive compliance monitoring, the EORC works to eliminate barriers that have historically hindered Disadvantaged Business Enterprises (DBE). By fostering a competitive and transparent contracting environment, the commission strives to create pathways for these businesses to thrive and contribute to the City's economic development. This dedication to equity is reflected in the EORC's initiatives to track participation, enforce diversity goals, and provide resources that empower disadvantaged businesses to succeed.

### 2025 Q2 Disadvantaged Business Enterprise Utilization

In Q2 of 2025, **Disadvantaged Business Enterprises (DBEs)** actively contributed to **46 city contracts** in which payment was disbursed to the Prime contractor, encompassing both construction and professional services, with a combined value of \$93.1 million. DBEs are slated to receive **33%** of these funds or **\$30.7 million** upon the completion of the projects, reflecting the City's commitment to equitable economic opportunities.

Among these contracts, **four (4)** were led by DBEs as **prime contractors**, including **three (3) contracts** awarded to **Women Business Enterprises (WBEs)**, and **one (1)** to **Minority**

**Business Enterprise (MBE).** Those projects in which DBEs are the Prime Contractors are listed below:

- Sheraden Park Phase 1 Improvements
- Oliver Bath House Renovation General Contractor
- Construction of Public Works 4<sup>th</sup> Division Streets Maintenance Facility
- Oliver Bath House Construction Management Services

### **2025 Q2 Subcontractor Disadvantaged Business Enterprise Contract Awards**

The subcontractor distribution further illustrates the participation of diverse businesses. In Q2 of 2025:

- **64** subcontracting roles were filled by **MBEs**,
- **86** subcontracting roles were filled by **WBEs**,
- **1** subcontracting role was filled by **LGBTQ-BE**, and
- **15** subcontracting roles were filled by **Veteran-Owned Small Businesses (VOSBs)**.

Payment and Utilization data for Q1 shows that:

- **21 MBEs** received a total of **\$1,080,476**,
- **15 WBEs** received a total of **\$201,488**, and
- **4 VOSBs** received a total **\$22,159**

*See Appendix A for a list of payments received for actual work performed and percentage of the total contract price paid of MWDBE's in Q2 of 2025.*

## **Vendor List and Tracking Work Performed**

As part of the OBD's commitment to ensuring DBEs have access to procurement opportunities within the City, the OBD maintains and monitors a list of certified DBEs within the region in coordination with certifying agencies. By working with certifying agencies like the **Pennsylvania Unified Certification Program (PAUCP)** and the **Small Business Administration (SBA)**, the office maintains a comprehensive and current database of certified DBEs. Additionally, the office partners with the **Three Rivers Business Alliance** to track and engage with LGBTQ+ certified vendors, which has produced a record increase of LGBTQ+ vendors on City contracts. Furthermore, collaboration with the **African American Chamber of Commerce** allows the office to maintain an updated list of certified Minority-owned businesses, strengthening opportunities for historically underrepresented entrepreneurs. These partnerships help the Office of Business Diversity foster a more inclusive and diverse business environment, as well as ensure our regions DBEs are aware of the contracting opportunities within the City.

### **Now Available – Public Listing of Current and Previous DBE Vendors on City Contracts**

As reported in our 2024 Annual Report, historically, a comprehensive listing of DBEs, both current and previous vendors on city contracts, as well as the lists of certifying agencies, has not been publicly available. We have made a listing available on our City of Pittsburgh Beacon website: <https://www.pittsburghpa.gov/Business-Development/Procurement/Beacon-Online-Procurement>. This is routinely updated to add newly certified and recertified vendors to the available listing.

As an update, in Q1 2025, we constructed a draft form for interested vendors to submit their information, including certifications, to be reviewed and added to this listing. Our goal was to have a centrally located, transparent, and comprehensive list by the end of Q2 of 2025 that will assist matching opportunities with vendors and primes to meet our DBE procurement goals. Unfortunately, we have experienced technological challenges that will not allow us to capture all the necessary information we need from a vendor. However, we are working with the City's Innovation and Performance Department to overcome these barriers and have this publicly available form to capture newly certified and recertified vendors.

*See Appendix B for list of names and addresses of each business utilized in Q2 of 2025.*

## **Administrative and Policy Initiatives**

### ***Overview of the Procurement Modernization Initiative***

In 2023, the City of Pittsburgh launched a Procurement Modernization Initiative to modernize our procurement policies, process, and systems to maximize diverse business participation, create access to opportunities for local businesses, and remove barriers for businesses to scale and grow so that everyone has an opportunity to thrive. This effort is lead by Deputy Chief of Staff Felicity Williams, as Executive Sponsor, and staffed by a cross-functional team made up of representatives of the Mayor's Office, Office of Business Diversity, Office of Equal Protection, Procurement, Office of Budget and Management, Law Department, and Innovation and Performance. The outcomes of this effort will enhance the transparency, standardization, consistency, and fairness of the City's contracting processes, as well as reduce inefficiencies.

After review of our data, we identified a clear need to prioritize improving our diverse business participation with prime vendors. While we are making strides as a City in our overall DBE utilization, we are still falling short in our realization of diverse business participation among our prime vendors.

To operationalize this work, we have been reviewing city code; aligning policy revisions and policy development to city code and best practices; enforcing dormant portions of city code; engaging and training internal staff; improving external communications; improving our data

systems to better measure our work; seeking national technical assistance; and conducting the first Regional Disparity Study for the first time in over two decades.

### ***In Progress Administrative and Policy Initiatives***

#### **Enhanced Tracking and Compliance for Equal Opportunity Review Commission – Implementing Alerts, Violations, and Recommendations/Sanctions**

Aligning the Equal Opportunity Review Commission (EORC) with the Pittsburgh City Code is essential to ensure consistency, transparency, and effectiveness in its operations. To achieve this alignment, we conducted a thorough review of each line of Section 177A to assess the current status and/or existing processes. This review identified whether responsibilities fell under the Office of Business Diversity (OBD), procurement, or other teams, and included a timeline with notes on necessary improvements. Following this review, EORC policies were established to ensure compliance with current legal requirements and to enhance operational effectiveness.

The Office of Business Diversity has implemented a new, structured, and proactive process to monitor subcontractor compliance through monthly audits using the B2GNow system. These audits help identify discrepancies in both subcontractor payments and participation commitments across City projects. In Q2 of 2025, OBD assisted subcontracting vendors in resolving payment discrepancies—whether they had received no payment or had been paid incorrectly.

Additionally, this process enabled OBD to identify contracts where the City's agreement had ended, subcontractors had completed their work, but had not been paid. Upon discovering this issue, OBD coordinated with the Law Department, project managers, and prime contractors to resolve outstanding payments and to implement safeguards preventing this from recurring in future contracts.

This comprehensive approach underscores our commitment to aligning EORC operations with City Code and reinforcing accountability and compliance within the City's procurement and contracting systems. By equipping the EORC with the authority and procedural framework necessary to evaluate contractor payments and utilization—and to recommend appropriate sanctions—we are strengthening enforcement mechanisms. While formal sanctions cannot be imposed until the City's disparity study is completed, this framework ensures that we are prepared to implement contractual remedies to uphold compliance moving forward.

#### **Updated Invitation for Bid (IFB) Solicitation Template and New Review and Selection Policy and Process**

As mentioned in previous reporting, we are updating our procurement processes to align with City Code. This includes revising solicitation templates and developing standardized review and

selection policies to eliminate inconsistent practices, enhance transparency, strengthen compliance, and ultimately ensure the selection of the most qualified vendors for the City.

We began by updating our Invitation for Bid (IFB) template and refining the review and selection process. One key improvement is the separation of the bid documents opening from the cost proposal opening. This change introduces a formal review of bidder "responsiveness" and "responsibility" before considering cost, aligning with industry best practices and legal standards. This ensures all submissions are thoroughly and fairly evaluated before awarding contracts.

In Q2 of 2025, we implemented this new process through a pilot project—the **Brighton Heights HALC** solicitation—with promising initial results. The new approach enabled us to identify non-responsive bidders early and provided a structured opportunity for clarification and correction when appropriate. As a result, we were able to select the lowest, *responsive, and responsible* bidder. While the outcomes have been positive, we recognize there are still refinements to be made to improve the experience for all stakeholders involved.

Looking ahead, we are committed to continuous improvement of this process. The pilot project has laid a strong foundation, and the insights gained will inform critical adjustments as we prepare for a citywide rollout in Q3 of 2025. This initiative represents a significant step toward modernizing and systemizing the City's procurement function—building a process that is fair, defensible, and rooted in equity; while ensuring we secure the highest quality services for the public good.

#### Procurement for Good Jobs Update as of Q2 of 2025

The City of Pittsburgh is one of four cities selected to participate in the Procurement for Good Jobs initiative with Partners for Public Good to receive technical assistance to use procurement as a lever for inclusive workforce development, job quality, and local economic empowerment. This will support implementation of workforce participation and job quality requirements on City contracts rooted in the Pittsburgh Good Job Principles and in furtherance of the goals of Chapter 177A.02. This will further the City's equity goals of providing individuals with equitable procurement opportunities and employment opportunities who reside in a community of Extreme or High Need (as designated by the Allegheny County Community Need Index) or falls into one of the following categories:

- System involved/emancipated youth (14-30) or opportunity youth
- Returning citizens and individuals having a criminal record or other involvement with the criminal justice system
- Custodial single parents/households
- Refugees and immigrants

Our *Procurement for Good Jobs* initiative is steadily advancing through a focused, collaborative workshop series designed to complete a solicitation sprint for our pilot project: **Robert E. Williams Memorial Park and Pavilion**. In Session 4, we explored market research and scope of

work development, identifying opportunities to engage vendors who prioritize equitable employment practices. In Session 5, we created evaluation criteria and proposal questions that elevate job quality, ensuring these values are embedded in the vendor selection process.

With the workshops now completed, we have finalized a scope of work that includes requirements for hiring disadvantaged workers. This solicitation is scheduled to go out for bid in early Q3 of 2025.

The final workshop will focus on post-award strategies and long-term sustainability—addressing how to maintain momentum, measure impact, and build internal capacity to support good jobs over time. These final sessions will help solidify our framework and ensure it can be effectively implemented and scaled.

Together, these sessions are shaping a clear and actionable roadmap to integrate job quality standards into the City’s procurement practices.

### ***Pittsburgh Regional Disparity Study Progress as of Q2 of 2025***

Under the leadership of Mayor Ed Gainey, we have assembled the largest consortium of public partners in recent history, comprised of the City of Pittsburgh, Allegheny County, Housing Authority of the City of Pittsburgh (HACP), Urban Redevelopment Authority (URA), Parking Authority, Pittsburgh Water (formerly PWSA), and the Stadium Authority to undertake all necessary and reasonable steps to ensure that minority-owned, woman-owned (“MWBEs”), and LGBTQ-owned (LGBTQ-BE) businesses are afforded equitable opportunities to participate in local government and other contracts within our region. Study Consortium members are keenly interested in ensuring that their public contracting and purchasing funds are not spent in a manner that in any way contributes to or perpetuates the effects of marketplace discrimination.

To achieve this goal, we have sought a consultant to conduct various work elements in a business disparity causation analysis study that:

- Determines the availability of MWBEs and LGBTQBEs within the relevant market area(s) creating a regional database;
- Identifies the nature of, and determines the extent to which, any barriers may have resulted in disparities in the utilization of available MWBEs and LGBTQBEs in public and private sector contracts;
- Analyzes the contracting and procurement data of each Study Consortium member to determine its respective MWBE and LGBTQBE utilization, as well as the Study Consortium’s collective utilization as a whole;
- Determines the extent to which any identified disparities by any member of the Study Consortium, and by the Study Consortium as a whole, might be impacted by discrimination;
- Identifies and summarizes related findings from previous disparity studies and research;

- Analyzes the effectiveness of various race-and gender-neutral remedies and practices previously undertaken in the relevant marketplace; and
- Determines the broader economic development impacts from any race- and gender-conscious programs and policies in the region; and
- Reviews existing procurement programs, policies, and practices; makes recommendations that are narrowly tailored to remedy the effects of any identified discrimination and to reduce or eliminate any other marketplace barriers that adversely affect the utilization of MWBEs and LGBTQBEs by Study Consortium members

The Pittsburgh Regional Disparity Study will be the first in over twenty years, far beyond the requirement to provide an updated disparity study every five-years in order to set enforceable participation goals for MWBEs. Providing this legal foundation is critical given the recent direction of our federal courts both reversing longstanding legal doctrine and bringing increased scrutiny to efforts that promote diversity, equity, and inclusion. The policy positions of the incoming federal administration only further the need to ensure we continue to address historic disinvestment and systemic inequities that hinder the economic and population growth of the historically marginalized communities in our region. We have officially launched the Disparity Study and will be initiating the public engagement phase in Q3 of 2025.

### Project Status and Timeline

We are excited to share that our Disparity Study is actively underway, marking a significant milestone in our efforts to promote equity and transparency within the City's procurement processes. The data collection phase is now complete, except for the Urban Redevelopment Authority, during which we gathered detailed payment and contract records spanning a five-year period. This historical data is critical for identifying trends in contract awards, including which businesses are receiving work and in what capacity. The analysis will help us assess the availability of opportunities for minority- and women-owned businesses and determine whether disparities exist between the number of qualified firms and those actually being utilized in City contracts.

In addition to contract data, we are collecting procurement policies and procedures from departments across the City. These documents will be reviewed to identify potential barriers or gaps that may limit equitable participation in the procurement process. By analyzing our current framework, we aim to highlight areas for improvement, streamline procurement practices, and ensure future policies promote fair and inclusive access to contracting opportunities. The findings from both the data analysis and policy review will inform actionable recommendations that reinforce our commitment to equity and accountability in City contracting.

We are now entering the external engagement phase of the study. During this phase, our Disparity Study consultant will engage both MWDBE, LGBTQ-BE and non-DBE firms across

the marketplace to gather qualitative data through in-depth interviews, business surveys, and focus groups. These conversations will help uncover real-world experiences and insights into disparities that may exist in public contracting in the Pittsburgh region. To officially launch this engagement effort, we are hosting a public meeting on **August 6th**. Our goal is to connect with as many businesses as possible through the end of the fall and ensure that their voices are heard throughout this critical phase of the study.

You can learn more and follow the progress of the Pittsburgh Regional Disparity Study at <https://engage.pittsburghpa.gov/disparity-study>.

## Conclusion

Mayor Gainey's administration remains unwavering in its commitment to fostering equity, transparency, and inclusion throughout the City of Pittsburgh's procurement processes. The work led by the Office of Business Diversity (OBD) and the Equal Opportunity Review Commission (EORC) reflects a comprehensive and proactive approach to expanding opportunity for Minority Business Enterprises (MBEs), Women Business Enterprises (WBEs), Veteran-Owned Small Businesses (VOSBs), LGBTQ Business Enterprises (LGBTQ-BEs), and other historically disadvantaged businesses.

Throughout Q2 of 2025, we have continued to make meaningful progress. This includes the implementation of improved tools such as the updated Invitation for Bid (IFB) template, enhanced compliance monitoring through the B2GNow system, the rollout of public vendor listings, and a more structured review process to ensure fairness and transparency in contract awards. These foundational improvements are already shaping a more consistent and accountable procurement environment.

At the same time, initiatives like Procurement for Good Jobs and the Pittsburgh Regional Disparity Study demonstrate the City's commitment to long-term, systems-level change. These efforts aim not only to increase participation among underrepresented businesses but also to address the structural barriers that have historically limited access to economic opportunity. By embedding job quality and participation requirements into solicitations, and by developing a legally sound foundation for future enforcement through the disparity study, we are setting the stage for sustainable and measurable progress.

Despite these advances, the data clearly shows that more work is needed—especially in increasing diverse participation at the prime contractor level and ensuring full, timely payment to subcontractors. These are not just operational issues; they are equity issues. Our ongoing policy reform strengthened compliance mechanisms, and renewed focus on public accountability are designed to directly address these gaps.

As we continue through 2025, we remain focused on institutionalizing change that will outlast any single administration. Our strategy—rooted in partnership, transparency, and accountability—will continue to guide our work to ensure that all businesses, regardless of size or ownership, have equitable access to the economic opportunities the City of Pittsburgh offers. By doing so, we are not only expanding participation—we are building a more inclusive economy that reflects the full strength and diversity of our city.
